Reviewing Data Drift

You can view the data drift metrics your monitor has collected in Azure Machine Learning studio.

- To see data drift for datasets, view the **Dataset monitors** tab of the **Datasets** page.
- To see data drift for a deployed model, open the model on the **Models** page and view its **Data drift** tab.

Data Drift Visualizations

Data drift visualizations for datasets include a line chart showing the overall data drift magnitude trend.

Additionally, you can also see details of data drift for individual features.
